

Technical Bulletin

Sure-Bond PlusTM Pellet and Block Binder

Typical Characteristics:

Ingredients.....	PMC, kaolin, mineral oil
Resin type.....	Spray-dried Urea-formaldehyde
Form	Powder
Color	Off-white
Bulk Density.....	0.70 gm/cc – 0.850 gm/cc
Shelf Life at 25°C.....	12 mo. in original pkg.
Viscosity at 25°C	1000-2500 cps at 60% con.
Solubility in water.....	Complete
pH.....	7.30-8.50
Moisture content.....	< 3.5%
Free formaldehyde	< 0.5 %
Polymer content.....	72.5% min.

Ingredients

Urea-formaldehyde condensation polymer, kaolin, mineral oil

Applications

The ideal weather-proofing and binding additive for cubes, blocks, or pellets in animal feed.

Dosage Recommendations

Use 2 to 4 lbs. per ton of feed. When replacing other urea-formaldehyde binders, use at the same inclusion level. As a low-inclusion pellet binder, Sure-Bond Plus should be added together with other micro-ingredients.

As conditioning plays a very important role in pellet or cube quality, higher temperatures and low-pressure steam provide excellent wetting durability.

Availability

Stocked in local warehouses in 50 lbs. bags, also available in tote bags. The bagged product is stretch-wrapped and palletized.
